+ Thorough knowledge of HTML, CSS, Javascript and Js frameworks
+ Proficient in Web APIs
+ Familiar with non-relational databases such as MongoDB and Redis.
+ Proactive, professional and able to deal with people at all levels.
+ Capable of managing complex projects from start to finish
+ Familiar with Xamarin, Android and mobile development
+ Thorough knowledge of Agile and Scrum
+ Competent knowledge of design patterns
+ Competent use of Photoshop and Lightroom.
+ Proficient in the use of several versions of Visual Studio
+ Native in Spanish, fluent in English
+ Positive, can-do attitude.
+ Great teamwork skills
+ Knowledge of C#, JavaScript, Java and Python programming languages

WORK EXPERIENCE

Softvision
Feb 2018 to present
In this position I am involved in the design, development, and maintenance of enterprise systems, most of the time using cutting-edge technologies, in a challenging context.

Algeiba
Nov. 2018 – Feb. 2018

My role required me to migrate an existing .NET Core 1.0 and AngularJs software to .NET Core 2.2 and Angular 7. The front-end was completely rewritten while the back-end was improved in the process, adding Unit Tests as well.

Neoris
Feb. 2018 – Nov. 2018

My role mutated and besides my previous tasks, I started to have meetings with clients more often. I provided in-house training to future employees of the company. I moved to another company office in another city.

Neoris
Sep. 2014 – Jan. 2018

My role required me in the first months to maintain and troubleshoot legacy software. Later, I started to participate in the development of new systems, with tasks such as to record, analyze and interpret data, propose modifications and deploy software, write documentation and reports and give presentations, and make estimations of future features of the systems.

QUALIFICATIONS

Systems engineering
Universidad Tecnológica Nacional ~ 2008-2016
